

NRC. Opens a Project Management Office (PMO) to Consolidate All Projects "Under One Roof"

KYIV CITY, May 25, 2022 – Our Project Management Office (PMO) that organizes efficient work processes to deliver on-time and within budget and to meet your requirements at each stage of the project.

Our Project Management Office analyzes each project and looks through the business needs of the client to suggest an appropriate methodology. At NRC. PMO, we follow different variations of the Agile methodology to deliver projects efficiently:

- ✓ **Scrum.** We use Scrum for managing small projects like MVPs for startups. By splitting complex tasks into smaller units, Scrum helps us anticipate risks and speed up product release.
- ✓ **Scrumban.** Our project management team applies Scrumban to ongoing projects that require maximum flexibility. Scrumban can deal with frequently changing priorities and requirements.
- ✓ **Scaled Agile Framework.** The Scaled Agile Framework (SAFe) is designed to handle large-scale and complex projects with hundreds of participants. SAFe helps us deliver high-quality enterprise software and systems.

The NRC. PMO is responsible for the successful delivery of projects from the initiation stage through final delivery. Our project managers monitor each project on a daily basis and respond to all emerging issues.

Our PMO teams draw on experience with a range of technology and software to optimize every aspect of decision-making, including capital planning, cost management, financial forecasting and budgeting, issue management, portfolio management, project management, project scheduling, release management, resource management, and risk management.
